Clarification on the future of the Galaxy range

Dear partners and integrators,

We're writing to you today to dispel some of the rumors that have been circulating recently about our Galaxy product range. Contrary to the information that has been circulating, we would like to make it absolutely clear that there is absolutely no question of us stopping production of this range, nor of us ceasing to invest in its development.

The Galaxy range remains a strategic pillar of our offering, and we need not only to stay the course, but also to explore new technological horizons that will enable us to respond ever more effectively to the growing needs of our users and the market.

We are counting on you to pass on this information to your teams and customers, and to support us in this new phase of growth and innovation.

We remain at your disposal should you have any questions or require any further clarification. Thank you for your continued confidence and your valuable partnership.

Yours sincerely,

Dale McLaurin

Intrusion Offering Director

Honeywell | Commercial Security Group
