

S69-220

Industrial Gigabit Dual Power Output PoE Splitter

S69-220 is an industrial dual power output PoE Splitter which supports 802.3at/bt output standards. Powered by any Power Sourcing Equipment (PSE) that supports 802.3at/bt standards, S69-220 can split the output into 2 forms, DC voltage and PoE, to fulfill both DC power and PoE demands at the same time. With this feature, S69-220 can supply PoE to PoE input supported IP devices, and DC power to non-PoE IP devices simultaneously. This space-saving design eliminates additional power receptacles which usually take up too much room.
