New series

era

Advanced technology, modern and essential design with unbeatable quality value/price ratio.

The beginning of a new era.

Era is the first series of **compact outdoor** stations with advanced **access control** functionality, specifically designed for residential applications.

It can be expanded **up to 4 users** or as a version **with numeric keypad** and includes a proximity reader with **MIFARE/NFC** technology as standard.

It is a product entirely designed and **manufactured in Italy.**

Two button configuration

VIDEX

era

Compact and expandable

The outdoor station is **less than 10 cm wide and depth less than 3.**

However, it can be configured to call **up to 4 separate residential units** and includes advanced access control functions.

All this while remaining **extremely simple** to install and configure.

Quick and easy to set up

Most configurations and future adjustments can easily be implemented by changing the front keypad and moving the appropriate dip-switches.

It can also use **Bluetooth** technology to apply configuration changes, without the need for other software*.
*Requires software update

Quality and strength

The Era series archives **IP65** rating for weather resistance and **IK09** rating for impact resistance.
